SHOP STANDARD MEDIABLASTER®

The Shop Standard is a dry, siphon, R&D blast cabinet made from 100% welded 12- and 14-gauge cold rolled steel. It is available in 4 standard sizes to accommodate a variety of applications, and operates with a 5/16" 25 cfm gun size for faster part processing when daily operation is not needed or required.

Shop Standard Mediablaster®

- 13-1/2" x 15-1/2" View Window, Safety Glass
- Low Static Window Protector Glass
- Advanced LED Lighting
- 8" Work Ports
- All Air Controls
- Blow-Off Gun
- Abrasive Flow Control Mixing Valve
- Tungsten Carbide Nozzle

The Shop Standard is available in four (4) sizes.

The Shop Standard uses an easily cleaned tubular dust bag that gives you the almost Industrial Blasting Cabinet with a dust collector for people wanting a clean machine for non daily machine usage with Industrial machine features. These cabinets are larger, deeper, wider and taller and fully loaded with machine features; 100% welded steel cabinet construction with cleaner no spill door construction. This model has the outside blower directly attached to the patented separator reclaimer located inside the cabinet. The blower sends only the dust removed from the abrasive being recycled into the tubular dust bag. To clean, simply turn off the blower and quickly flip the dust bag dropping the dust collected inside the bag directly into the removable waste pail located at the bottom the dust bag.

The Shop Standard is one step closer to Production Machine Durability without the Production machine cost.

This type of machine design is seldom found in today's market, but being the first model designed by Media Blast it can say a lot about more machine for less cost.

Industrial Features like; Patented separator reclaimer, adjustable abrasive mixing valve, window protector, foot operated blast, all air controls, 550 cfm exhaust blower, LED cabinet lighting and much, much more.

You can also inspect the **Shop Standard 2.0** for a similar model with 100% welded negative pressure dust cartridge collector with vibrator cleaning cycle.

Larger Model 4836 shown with Optional 24" Window
